Summary

Applied AI and Machine Learning Engineer with hands on experience turning raw data into actionable insights across insurance, robotics, and geospatial domains. Built data-driven decision systems including a dynamic pricing engine (XGBoost) and fraud detection pipeline (Isolation Forest) for a national award-winning insurance platform. Microsoft Certified: SQL AI Developer Associate, with SQL skills further validated by qualifying for Round 2 of Flipkart GRiD 8.0 and clearing the technical interview round for a Data Analyst position at EY GDS. National Finalist, Guidewire DEV Trails 2026 (Top 5 of 4,400+ teams, ₹1 Lakh Merit Award) and e-Yantra IIT Bombay (Top 20 of 1,000+ teams).

Education

Bala Krishna Matric Hr. Sec. School SSC($10^{Th'2021}$) : 95 % & HSC($12^{th'2024}$) : 93%(Centum maths,197/200)

Sri Eshwar College of Engineering, Anna University. **07/2024 – 03/2028**

Bachelor of Technology in Artificial Intelligence and data science(Hons) Ggpa :9.02/10

Relevant Coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Database Management Systems, Computer network

Research works : Neuro Symbolic Physical AI Planning: Investigating the integration of neural perception, symbolic reasoning, and search-based planning for robust decision-making in embodied/physical AI agents.

Technical Projects

Susanoo – AI-Powered Parametric Insurance Platform |Guidewire DEV Trails 2026 (Top 5/4,400+ Teams | ₹1 Lakh Merit)
Technologies: Python, Fast API, Flutter, AWS, XG Boost, Isolation Forest, REST APIs **01/2026 – 05/2026**

- Designed and developed an AI-powered parametric insurance platform that automates claim assessment for gig delivery workers using real-time weather intelligence. Engineered an ML-based dynamic pricing engine using **XG Boost** and an AI fraud detection pipeline using **Isolation Forest** for policy risk evaluation.
- Integrated Weather and News APIs to automate disruption detection, streamline claim verification, and support AI-driven insurance workflows. Rapidly prototyped and validated the solution during Guidewire DEV Trails 2026, earning national recognition among **4,400+ teams**.

InsureBot – Multilingual AI Voice Assistant |Valu Enable 2025 (Top 5 Finalist);Technologies: Lang Chain, Grog API, Llama 3, Eleven Labs, Python, Prompt Engineering **08/2025 - 03/2026**

- Developed a multilingual AI voice assistant to automate insurance policy, claims, renewals, and customer support interactions. Built conversational workflows using **Lang Chain**, integrating **Grog API**, **Llama 3**, and **Eleven Labs** for real-time voice-based AI assistance.
- Implemented interruption detection, latency optimization, sentiment analysis, and adaptive voice responses to improve user experience. Rapidly prototyped and validated AI-driven customer support workflows using Generative AI and prompt engineering.

Autonomous Agri Delivery Agent| e-Yantra Robotics, IIT Bombay (Finalist – Top 20/1000+ Teams)
Technologies: Lang Graph, OpenCV, STM32, Coppelia Sim, Python, Reinforcement **09/2025 –10/2025**

- Designed an Agentic AI workflow for autonomous agricultural logistics using Lang Graph based multi-agent coordination. Implemented computer vision and reinforcement learning for automated navigation, crop identification, and delivery decision making.
- Developed an autonomous perception pipeline that reduced manual intervention through AI-driven navigation and task execution. Iteratively tested and optimized navigation models through simulation and hardware deployment.

Internships

AI Data Annotator @ Innodata **2026**

Annotated and validated multimodal datasets including **text, image, audio, and video** to improve AI model training, evaluation, and quality assurance. Performed quality review and classification tasks on the **Multi mango** platform, ensuring high annotation accuracy across diverse AI use cases. Collaborated with annotation guidelines and evaluation workflows to support the development of production-grade AI models.

AI Engineer Intern @ Synapse Logic 2025

Developed an AI-powered satellite anomaly detection system using Sentinel-2 imagery and CNN-based models to automate manual inspection workflows. Built an Agentic AI pipeline for autonomous image labelling and classification, improving dataset preparation and annotation efficiency. Integrated external LLM APIs with tool calling to prototype multi model ai.

AI Associate Intern @ ServiceNow University **2026**

Completed an intensive 8-week AICTE–ServiceNow University virtual internship focused on enterprise platform administration, AI-powered workflow automation, and Automated Test Framework (ATF) through hands-on labs and guided projects.

CERTIFICATIONS

- **SQL AI Developer** Associate – Microsoft, Jul 2026
- **Wells Fargo Software Engineering Job Simulation** – Forage, Jul 2026
- **Fabric Analytics Engineer Associate** – Microsoft, Aug 2026
- **Google Cloud Gen Ai APAC,** – Google Cloud, Apr 2026
- **Agentic AI Foundations & Foundation of Java** – Oracle, Jun 2026 & Oracle, Aug 2025
- **Ai Essential & Database management systems & Design Thinking Premier** – ServiceNow & Hacker Rank & NPTEL

Honors & Awards

Guidewire DEV Trails 2026 – Merit Award Winner (Top 5ll/4,400+ Teams | ₹1 Lakh Cash Prize) Guidewire &AWS

- Awarded **Top 5** nationally among **4,400+ teams (18,000+ participants)** for developing **Susanoo**, an AI-powered parametric insurance platform for gig delivery workers. Recognized for applying **AI/ML, real-time APIs, and workflow automation** to automate insurance pricing, fraud detection, and claim processing.

e-Yantra Robotics – IIT Bombay Finalist (Top 20/1,000+ Teams) Ministry of Education , Government of India | 2026

- National finalist for developing an **Agentic AI-powered autonomous agricultural robot** using **Lang Graph, Reinforcement Learning, OpenCV, and YOLOv8**.Demonstrated autonomous navigation, crop detection, and multi-agent decision-making in simulated agricultural environments.

Valu Enable – AI Insurance Agent Finalist (Top 5 Teams) Valu Enable company |2025

- Built a multilingual **LLM-powered AI voice assistant** using **Lang Chain, Llama 3, Grog API, and Eleven Labs** for insurance support and customer query automation.

Tamil Nadu Regional Finalist – TN Skills Robot System Integration | 2025

- Competed in the state-level Robot System Integration challenge, implementing industrial automation, FANUC robot programming, system integration, and robotic workflow optimization.

Additional Achievements: | 2024-2026

- Semifinalist – Caterpillar Tech Challenge; Finalist – Hyrup Hackathon, Hack Sprint 2.0 (Top 50), GenAI Hackathon MLCBE 2025 (I am Neo), TechSprint'26 (GDG On Campus SECE); Track Prize Winner – PEC Hacks 3.0; 1st Prize – McNorton Project Expo (CIT), Crypt era 2K26 Paper Presentation (CIT),Mumbai Hacks Finalist.

Coding Profiles

Skill rack	Solved 1000+ problems | Received 9 certificates | 280+ Bronzes | Joseph sam
Leet Code	Solved 450+ Problems | Max contest Rate : 1651 | 365 Days Badge| Joseph sam
Hacker Rank	3 stars in C & python | 2 stars in Java | 2 stars in Problem Solving & SQL
Code forces	50+ problems | Max contest rate : 794 | Joseph sam

Technical Skills

Generative AI & Agentic AI: Lang Chain, Lang Graph, Prompt Engineering, Multi-Agent Systems, Tool Calling, AI Workflow Orchestration , LLM Evaluation , RAG, AI Agents, Function Calling , MCP,
LLMs & AI APIs: Gemini API, DeepSeek API, Llama, Olema, Grog API**,** vector embedding , github copilot , Cursor , claude code
Machine Learning & Deep Learning: Py Torch, TensorFlow, Scikit-learn, Transformers, XG Boost, Isolation Forest, Reinforcement Learning, Feature Engineering, Model Evaluation, Model Optimization
Computer Vision : OpenCV, YOLOv8, CNN, Image Classification, Object Detection, Image Segmentation, OCR
Natural Language Processing: Text Classification, Semantic Search, Information Retrieval, Sentiment Analysis, LLM Fine-tuning.
Vector Databases & RAG: Retrieval-Augmented Generation (RAG), Vector Search, Semantic Retrieval,MCP.
Programming Languages: Python, C++,C,SQL,
Databases & Backend & APIs : PostgreSQL, SQLite, Supa base, Fast API, REST APIs, JSON
Cloud & DevOps: Google Cloud Platform(GCP), Docker, CI/CD pipelines , AWS
Developer Tools: Git, GitHub, VS Code, Google Colab, Jupyter Notebooks, Kaggle

Leadership / Extracurricular

Hack hazards 26 Hackathon Ambassador 2026
Coordinated one of India's largest global hackathons, supporting **10,000+ team registrations for $6K prize pool**.

Google developer Groups App Dev Co-Lead On campus SECE 2025-2026
Co-led the App Development community by organizing **3+ technical events** (**Tech Sprint, National CTF, Hack Sprint**) for **1,000+ students**. Conducted workshops on **Google AI tools**, promoting AI adoption and hands-on learning across the campus developer community.

Open Source Contributor Google Time sketch & Tweak cn 2026

Campus Ambassador for TVS Credit EPIC 8.0: Represented the college and drove student outreach. 2026
